

SLI Bridge-101 mm

101 mm Flexible SLI Bridge Connector

- 101 mm Length
- Connects two NVIDIA® Graphics Cards
- Compatible with larger Graphics Card Coolers

SLI Bridge – 101 mm

101 mm Flexible SLI Bridge Connector

This cable enables two 3-slot graphic cards from NVIDIA® to share the same signal on the motherboard.

With a flexible length of 101 mm, comparing with generic SLI cables which are 8 cm long, not only you can connect the graphics cards on the motherboard with one slot apart, it won't be a problem even when there is a large size graphics card cooler installed between.

Specifications	
Length	101 mm
Warranty	2 years
